 - Ensure compliance with relevant IS (Indian Standards) and IRC (Indian Roads Congress) codes.
- **Material Selection:**
 - Choose appropriate concrete mix (commonly M30 or M40) as per design requirements.
 - Select quality aggregates, cement, and any necessary admixtures.

2. Site Preparation

- **Excavation:**
 - Excavate the area to the required depth based on design specifications.
- **Subgrade Preparation:**
 - Compact the subgrade using mechanical compaction equipment to achieve the desired density.
 - Ensure the surface is level and free of loose material.

3. Base Layer Construction

- **Dry Lean Concrete Base:**
 - Lay a DLC base layer (typically 100-150 mm thick).
 - Compact this layer thoroughly to provide a stable foundation for the concrete.

4. Separation Layer

- Optionally, a separation layer may be placed over the base layer for leveling.

5. Setting Up the Concrete Paver Machine

- **Machine Calibration:**
 - Calibrate the paver machine to the specified thickness and width of the pavement.
 - Ensure proper settings for the concrete mix delivery and vibratory consolidation.

6. Paving Operation

- **Concrete Pouring:**
 - Pour the concrete mix into the hopper of the paver machine.
 - The machine will spread and level the concrete automatically, following the predetermined path.
- **Compaction and Finishing:**
 - The paver machine uses vibratory mechanisms to compact the concrete, ensuring a dense and uniform surface.
 - The machine may also include finishing tools to create a smooth surface.

7. Joint Formation

- **Control Joints:**
 - Implement control joints at specified intervals to control cracking.
 - Joints can be formed using jointing tools attached to the paver or cut after the concrete has set.

8. Curing

- **Curing Process:**
 - Cure the pavement for a minimum of 7 days using water or curing compounds to ensure proper hydration.
 - Protect the surface from traffic and harsh weather conditions during the curing period.

9. Quality Control

- **Inspection:**
 - Regularly monitor the paving process for alignment, thickness, and surface finish.
 - Conduct tests on concrete samples for compressive strength.

10. Final Touches

- **Surface Cleaning:**

- Remove any excess concrete or debris from the surface.
- Ensure that all joints are clean and properly filled if needed.
- **Traffic Management:**
 - Wait for the concrete to reach adequate strength before opening the pavement to traffic.
 - Use appropriate signage and barriers to manage traffic during the curing period

Annexure-I**INTEGRITY PACT IN DEENDAYAL PORT AUTHORITY**

The Central Vigilance Commission (CVC) has been promoting integrity, transparency, equity and competitiveness in transactions by various organizations of the Government of India. Public procurement is an area of concern for the CVC, and many steps have been taken to put proper systems in place. In this context, Integrity Pact (IP), a tool conceptualized and promoted by Transparency International, an international NGO, aimed at preventing corruption in public contracting, has been found useful. It has been decided by Ministry of Shipping that all organizations under the Ministry will implement IP. IP should cover every tender / procurement above a specified threshold value. The threshold value of contracts / procurements / transactions incorporating IP would be such that it covers 90% by value of all contracts / procurements / transactions of the organization in the last 3 years. Presently the threshold is fixed as ₹50 Lakhs. IP essentially envisages an agreement between prospective vendors / bidders, and Deendayal Port Authority, committing the persons / officials of both sides not to resort to any corrupt practice in any aspect of the contract at any stage. Only those vendors / bidders, who commit themselves to IP with DPA, would be considered competent to participate in the bid process. Any violation would entail disqualification of the bidders and exclusion from future business dealings. IP, in respect of a particular contract should cover all phases of the contract, from the stage of Notice inviting Tender (NIT) / pre-bid stage, till the conclusion of the contract, i.e. final payment or the warranty / guarantee period. IP would be implemented through Independent External Monitor (IEM), who are eminent persons appointed by the organization, with approval of CVC. The term of appointment for an IEM would be 3 years. Name of the IEM will be mentioned in NIT. The IEM would review independently and objectively assess, as to whether and to what extent parties have complied with their obligations under the IP. IEM would have access to all contract documents, whenever required. The bidders may raise disputes / complaints if any, with the IEM. The IEM would examine complaints received by them and give their recommendations / views to the Chairman of Port Authority. Recommendations of IEM would be in the nature of advice and would not be legally binding. Their role is independent in nature and the advice once tendered would not be subject to review at the request of the organization. Shri Amiya Kumar Mohapatra IFoS, (Retd.), Dr. Gopal Dhawan, Ex-CMD, MECL has been appointed IEM by DPA. Draft condition to be incorporated in the Draft Tender papers 1) Then bidder has to execute Integrity pact agreement with Deendayal Port Authority. As per Shri Amiya Kumar Mohapatra IFoS, (Retd.), Dr. Gopal Dhawan, Ex-CMD, MECL has been nominated as Independent External Monitor for Integrity Pact whose address is as under;
